

BOOTSTRAP 5

Content

([HTTPS://GETBOOTSTRAP.COM/DOCS/5.3/CONTENT](https://getbootstrap.com/docs/5.3/content))

CONTENT

1. Reboot
2. Typography
3. Images
4. Tables
5. Figures

1. REBOOT

Reboot, a collection of element-specific CSS changes in a single file, kickstart Bootstrap to provide an elegant, consistent, and simple baseline to build upon.

Url: <https://getbootstrap.com/docs/5.3/content/reboot/>

2. TYPOGRAPHY

2.1. Headings

2.2. Display headings

2.3. Inline text elements

2.4. Text utilities & helpers

2.1. HEADINGS

```
<h1>h1. Bootstrap heading</h1>
```

```
<h2>h2. Bootstrap heading</h2>
```

```
<h3>h3. Bootstrap heading</h3>
```

```
<h4>h4. Bootstrap heading</h4>
```

```
<h5>h5. Bootstrap heading</h5>
```

```
<h6>h6. Bootstrap heading</h6>
```

Heading	Example
<code><h1></h1></code>	h1. Bootstrap heading
<code><h2></h2></code>	h2. Bootstrap heading
<code><h3></h3></code>	h3. Bootstrap heading
<code><h4></h4></code>	h4. Bootstrap heading
<code><h5></h5></code>	h5. Bootstrap heading
<code><h6></h6></code>	h6. Bootstrap heading

```
<p class="h1">h1. Bootstrap heading</p>  
<p class="h2">h2. Bootstrap heading</p>  
<p class="h3">h3. Bootstrap heading</p>  
<p class="h4">h4. Bootstrap heading</p>  
<p class="h5">h5. Bootstrap heading</p>  
<p class="h6">h6. Bootstrap heading</p>
```

h1. Bootstrap heading

h2. Bootstrap heading

h3. Bootstrap heading

h4. Bootstrap heading

h5. Bootstrap heading

h6. Bootstrap heading

2.2. DISPLAY HEADINGS

Traditional heading elements are designed to work best in the meat of your page content. When you need a heading to stand out, consider using a **display heading**—a larger, slightly more opinionated heading style.

```
<h1 class="display-1">Display 1</h1>  
<h1 class="display-2">Display 2</h1>  
<h1 class="display-3">Display 3</h1>  
<h1 class="display-4">Display 4</h1>  
<h1 class="display-5">Display 5</h1>  
<h1 class="display-6">Display 6</h1>
```

Display 1

Display 2

Display 3

Display 4

Display 5

Display 6

2.3. INLINE TEXT ELEMENTS

Styling for common inline HTML5 elements.

You can use the mark tag to highlight text.

~~This line of text is meant to be treated as deleted text.~~

~~This line of text is meant to be treated as no longer accurate.~~

This line of text is meant to be treated as an addition to the document.

This line of text will render as underlined

This line of text is meant to be treated as fine print.

This line rendered as bold text.

This line rendered as italicized text.

```
<p>You can use the mark tag to <mark>highlight</mark> text.</p>
```

```
<p><del>This line of text is meant to be treated as deleted text.</del></p>
```

```
<p><s>This line of text is meant to be treated as no longer accurate.</s></p>
```

```
<p><ins>This line of text is meant to be treated as an addition to the document.</ins></p>
```

```
<p><u>This line of text will render as underlined</u></p>
```

```
<p><small>This line of text is meant to be treated as fine print.</small></p>
```

```
<p><strong>This line rendered as bold text.</strong></p>
```

```
<p><em>This line rendered as italicized text.</em></p>
```

If you want to style your text, you should use the following classes instead:

- `.mark` will apply the same styles as `<mark>`.
 - `.small` will apply the same styles as `<small>`.
 - `.text-decoration-underline` will apply the same styles as `<u>`.
 - `.text-decoration-line-through` will apply the same styles as `<s>`.
- While not shown above, feel free to use `` and `<i>` in HTML5.

2.4. TEXT UTILITIES & HELPERS

Change text alignment, transform, style, weight, line-height, decoration and color with our text utilities and color utilities.

2.4.1. Text utilities

2.4.2. Color utilities

2.4.3. Text truncation helper

2.4.4. Color links helper

2.4.5. Background utilities

2.4.1. TEXT UTILITIES

2.4.1.1. Text alignment

2.4.1.2. Text wrapping and overflow

2.4.1.3. Text transform

2.4.1.4. Font size

2.4.1.5. Font weight and italics

2.4.1.6. Text decoration

2.4.1.1. TEXT ALIGNMENT

```
<p class="text-start">Start aligned text on all viewport sizes.</p>
```

```
<p class="text-center">Center aligned text on all viewport sizes.</p>
```

```
<p class="text-end">End aligned text on all viewport sizes.</p>
```

```
<p class="text-sm-start">Start aligned text on viewports sized SM (small) or wider.</p>
```

```
<p class="text-md-start">Start aligned text on viewports sized MD (medium) or wider.</p>
```

```
<p class="text-lg-start">Start aligned text on viewports sized LG (large) or wider.</p>
```

```
<p class="text-xl-start">Start aligned text on viewports sized XL (extra-large) or wider.</p>
```

Start aligned text on all viewport sizes.

Center aligned text on all viewport sizes.

End aligned text on all viewport sizes.

Start aligned text on viewports sized SM (small) or wider.

Start aligned text on viewports sized MD (medium) or wider.

Start aligned text on viewports sized LG (large) or wider.

Start aligned text on viewports sized XL (extra-large) or wider.

2.4.1.3. TEXT TRANSFORM

Transform text in components with text capitalization classes.

```
<p class="text-lowercase">Lowercased text.</p>  
<p class="text-uppercase">Uppercased text.</p>  
<p class="text-capitalize">CapiTaliZed text.</p>
```

lowercased text.

UPPERCASED TEXT.

CapiTaliZed Text.

2.4.1.4. FONT SIZE

Quickly change the **font-size** of text. While our heading classes (e.g., **.h1–.h6**) apply **font-size**, **font-weight**, and **line-height**, these utilities only apply **font-size**.

```
<p class="fs-1">.fs-1 text</p>  
<p class="fs-2">.fs-2 text</p>  
<p class="fs-3">.fs-3 text</p>  
<p class="fs-4">.fs-4 text</p>  
<p class="fs-5">.fs-5 text</p>  
<p class="fs-6">.fs-6 text</p>
```

.fs-1 text

.fs-2 text

.fs-3 text

.fs-4 text

.fs-5 text

.fs-6 text

2.4.1.5. FONT WEIGHT & ITALICS

Quickly change the **font-weight** or **font-style** of text with these utilities. **font-style** utilities are abbreviated as **.fst-*** and **font-weight** utilities are abbreviated as **.fw-***.

```
<p class="fw-bold">Bold text.</p>
<p class="fw-bolder">Bolder weight text (relative to the parent element).</p>
<p class="fw-normal">Normal weight text.</p>
<p class="fw-light">Light weight text.</p>
<p class="fw-lighter">Lighter weight text (relative to the parent element).</p>
<p class="fst-italic">Italic text.</p>
<p class="fst-normal">Text with normal font style</p>
```

Bold text.

Bolder weight text (relative to the parent element).

Normal weight text.

Light weight text.

Lighter weight text (relative to the parent element).

Italic text.

Text with normal font style

2.4.1.6. TEXT DECORATION

Decorate text in components with text decoration classes.

```
<p class="text-decoration-underline">This text has a line underneath it.</p>  
<p class="text-decoration-line-through">This text has a line going through it.</p>  
<a href="#" class="text-decoration-none">This link has its text decoration removed</a>
```

This text has a line underneath it.

~~This text has a line going through it.~~

[This link has its text decoration removed](#)

2.4.2. COLOR UTILITIES

Convey meaning through **color** with a handful of color utility classes. Includes support for styling links with hover states, too.

```
<p class="text-primary">.text-primary</p>
<p class="text-secondary">.text-secondary</p>
<p class="text-success">.text-success</p>
<p class="text-danger">.text-danger</p>
<p class="text-warning bg-dark">.text-warning</p>
<p class="text-info bg-dark">.text-info</p>
<p class="text-light bg-dark">.text-light</p>
<p class="text-dark">.text-dark</p>
<p class="text-body">.text-body</p>
<p class="text-muted">.text-muted</p>
<p class="text-white bg-dark">.text-white</p>
<p class="text-black-50">.text-black-50</p>
<p class="text-white-50 bg-dark">.text-white-50</p>
```

.text-primary

.text-secondary

.text-success

.text-danger

.text-warning

.text-info

.text-light

.text-dark

.text-body

.text-muted

.text-white

.text-black-50

.text-white-50

2.4.3. TEXT TRUNCATION HELPER

Add a `.text-truncate` class to truncate the text with an ellipsis.
Requires `display: inline-block` or `display: block`.

```
<!-- Block level -->
<div class="row">
  <div class="col-2 text-truncate">
    Praeterea iter est quasdam res quas ex communi.
  </div>
</div>

<!-- Inline level -->
<span class="d-inline-block text-truncate" style="max-width: 150px;">
  Praeterea iter est quasdam res quas ex communi.
</span>
```

Praeterea it...

Praeterea iter est q...

2.4.4. COLORED LINKS HELPER

Colored links with hover & focus states. Use the `.link-*` classes to colorize links.

```
<a href="#" class="link-primary">Primary link</a>  
<a href="#" class="link-secondary">Secondary link</a>  
<a href="#" class="link-success">Success link</a>  
<a href="#" class="link-danger">Danger link</a>  
<a href="#" class="link-warning">Warning link</a>  
<a href="#" class="link-info">Info link</a>  
<a href="#" class="link-light">Light link</a>  
<a href="#" class="link-dark">Dark link</a>
```

[Primary link](#) [Secondary link](#) [Success link](#) [Danger link](#) [Warning link](#) [Info link](#) [Light link](#) [Dark link](#)

2.4.5. BACKGROUND UTILITIES

Convey meaning through **background-color** and add decoration with gradients.

2.4.5.1. Background color

2.4.5.2. Contrasting foreground color

2.4.5.3. Background gradient

2.4.5.4. Opacity

2.4.5.1. BACKGROUND COLOR

```
<div class="p-3 mb-2 bg-primary text-white">.bg-primary</div>
<div class="p-3 mb-2 bg-secondary text-white">.bg-secondary</div>
<div class="p-3 mb-2 bg-success text-white">.bg-success</div>
<div class="p-3 mb-2 bg-danger text-white">.bg-danger</div>
<div class="p-3 mb-2 bg-warning text-dark">.bg-warning</div>
<div class="p-3 mb-2 bg-info text-dark">.bg-info</div>
<div class="p-3 mb-2 bg-light text-dark">.bg-light</div>
<div class="p-3 mb-2 bg-dark text-white">.bg-dark</div>
<div class="p-3 mb-2 bg-body text-dark">.bg-body</div>
<div class="p-3 mb-2 bg-white text-dark">.bg-white</div>
<div class="p-3 mb-2 bg-transparent text-dark">.bg-transparent</div>
```

.bg-primary

.bg-secondary

.bg-success

.bg-danger

.bg-warning

.bg-info

.bg-light

.bg-dark

.bg-body

.bg-white

.bg-transparent

2.4.5.2. CONTRAST FOREGROUND COLOR

Primary with contrasting color
Secondary with contrasting color
Success with contrasting color
Danger with contrasting color
Warning with contrasting color
Info with contrasting color
Light with contrasting color
Dark with contrasting color

```
<div class="text-bg-primary p-3">Primary with contrasting color</div>
<div class="text-bg-secondary p-3">Secondary with contrasting color</div>
<div class="text-bg-success p-3">Success with contrasting color</div>
<div class="text-bg-danger p-3">Danger with contrasting color</div>
<div class="text-bg-warning p-3">Warning with contrasting color</div>
<div class="text-bg-info p-3">Info with contrasting color</div>
<div class="text-bg-light p-3">Light with contrasting color</div>
<div class="text-bg-dark p-3">Dark with contrasting color</div>
```

2.4.5.3. BACKGROUND GRADIENT

By adding a **.bg-gradient** class, a linear gradient is added as background image to the backgrounds.

`.bg-primary.bg-gradient`

`.bg-secondary.bg-gradient`

`.bg-success.bg-gradient`

`.bg-danger.bg-gradient`

`.bg-warning.bg-gradient`

`.bg-info.bg-gradient`

`.bg-light.bg-gradient`

`.bg-dark.bg-gradient`

2.4.5.4. OPACITY

```
<div class="bg-success p-2 text-white">This is default success background</div>  
<div class="bg-success p-2 text-white bg-opacity-75">This is 75% opacity success background</div>  
<div class="bg-success p-2 text-dark bg-opacity-50">This is 50% opacity success background</div>  
<div class="bg-success p-2 text-dark bg-opacity-25">This is 25% opacity success background</div>  
<div class="bg-success p-2 text-dark bg-opacity-10">This is 10% opacity success background</div>
```

This is default success background

This is 75% opacity success background

This is 50% opacity success background

This is 25% opacity success background

This is 10% opacity success background

3. IMAGES

Documentation and examples for opting images into responsive behavior.

3.1. Responsive images

3.2. Image thumbnails

3.3. Aligning images

3.4. Borders utility

3.1. RESPONSIVE IMAGES

Images in Bootstrap are made responsive with `.img-fluid`. `max-width: 100%;` and `height: auto;` are applied to the image so that it scales with the parent element.

```

```

Responsive image

3.2. IMAGE THUMBNAILS

In addition to our [border-radius utilities](#), you can use `.img-thumbnail` to give an image a rounded 1px border appearance.

```

```

3.3. ALIGNING IMAGES

Align images with the [helper float classes](#) or [text alignment classes](#). [block](#)-level images can be centered using the [.mx-auto margin utility class](#).

```
  

```

200x200

200x200

```

```

```
<div class="text-center">  
    
</div>
```

200x200

3.4. BORDERS UTILITY

Use border utilities to quickly style the border and border-radius of an element. Great for images, buttons, or any other element.

3.4.1. Border color

3.4.2. Border width

3.4.3. Border sides

3.4.4. Border-radius

3.4.1. BORDER COLOR

Change the border color using utilities built on our theme colors.

```
<span class="border border-primary"></span>  
<span class="border border-secondary"></span>  
<span class="border border-success"></span>  
<span class="border border-danger"></span>  
<span class="border border-warning"></span>  
<span class="border border-info"></span>  
<span class="border border-light"></span>  
<span class="border border-dark"></span>  
<span class="border border-white"></span>
```

3.4.2. BORDER WIDTH

```
<span class="border border-1"></span>  
<span class="border border-2"></span>  
<span class="border border-3"></span>  
<span class="border border-4"></span>  
<span class="border border-5"></span>
```

3.4.3. BORDER SIDES

Use border utilities to add or remove an element's borders. Choose from all borders or one at a time.

```
<span class="border"></span>  
<span class="border-top"></span>  
<span class="border-end"></span>  
<span class="border-bottom"></span>  
<span class="border-start"></span>
```

```
<span class="border-0"></span>  
<span class="border-top-0"></span>  
<span class="border-end-0"></span>  
<span class="border-bottom-0"></span>  
<span class="border-start-0"></span>
```

3.4.4. BORDER-RADIUS

```
  
  
  
  
  
  

```

75x75

75x75

75x75

75x75

75x75

75x75

150x75

Use the scaling classes for larger or smaller rounded corners. Sizes range from 0 to 5, and can be configured by modifying the utilities API.

```
  
  
  
  
  

```

75x75

75x75

75x75

75x75

75x75

75x75

4. TABLES

4.1. Overview

4.2. Variants

4.3. Accented tables

4.4. Table borders

4.5. Small tables

4.6. Vertical alignment

4.7. Responsive tables

4.1. OVERVIEW

Due to the widespread use of tables across third-party widgets like calendars and date pickers, we've designed our tables to be opt-in. Just add the base class `.table` to any `<table>`, then extend with custom styles or our various included modifier classes.

```

<table class="table">
  <thead>
    <tr>
      <th scope="col">#</th>
      <th scope="col">First</th>
      <th scope="col">Last</th>
      <th scope="col">Handle</th>
    </tr>
  </thead>
  <tbody>
    <tr>
      <th scope="row">1</th>
      <td>Mark</td>
      <td>Otto</td>
      <td>@mdo</td>
    </tr>
    <tr>
      <th scope="row">2</th>
      <td>Jacob</td>
      <td>Thornton</td>
      <td>@fat</td>
    </tr>
    <tr>
      <th scope="row">3</th>
      <td colspan="2">Larry the Bird</td>
      <td>@twitter</td>
    </tr>
  </tbody>
</table>

```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.2. VARIANTS

Use contextual classes to color [tables](#), [table rows](#) or [individual cells](#).

Class	Heading	Heading
Default	Cell	Cell
Primary	Cell	Cell
Secondary	Cell	Cell
Success	Cell	Cell
Danger	Cell	Cell
Warning	Cell	Cell
Info	Cell	Cell
Light	Cell	Cell
Dark	Cell	Cell

```
<!-- On tables -->
```

```
<table class="table-primary">...</table>
```

```
<table class="table-secondary">...</table>
```

```
<table class="table-success">...</table>
```

```
<table class="table-danger">...</table>
```

```
<table class="table-warning">...</table>
```

```
<table class="table-info">...</table>
```

```
<table class="table-light">...</table>
```

```
<table class="table-dark">...</table>
```

```
<!-- On rows -->
```

```
<tr class="table-primary">...</tr>
```

```
<tr class="table-secondary">...</tr>
```

```
<tr class="table-success">...</tr>
```

```
<tr class="table-danger">...</tr>
```

```
<tr class="table-warning">...</tr>
```

```
<tr class="table-info">...</tr>
```

```
<tr class="table-light">...</tr>
```

```
<tr class="table-dark">...</tr>
```

```
<!-- On cells (`td` or `th`) -->
```

```
<tr>
```

```
  <td class="table-primary">...</td>
```

```
  <td class="table-secondary">...</td>
```

```
  <td class="table-success">...</td>
```

```
  <td class="table-danger">...</td>
```

```
  <td class="table-warning">...</td>
```

```
  <td class="table-info">...</td>
```

```
  <td class="table-light">...</td>
```

```
  <td class="table-dark">...</td>
```

```
</tr>
```

4.3. ACCENTED TABLES

4.3.1. Striped rows

4.3.2. Striped columns

4.3.3. Hoverable rows

4.3.1. STRIPED ROWS

Use `.table-striped` to add zebra-striping to any table row within the `<tbody>`.

```
<table class="table table-striped">
  ...
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.3.2. STRIPED COLUMNS

- Use `.table-striped-columns` to add zebra-striping to any table column.

```
<table class="table table-striped-columns">  
  ...  
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.3.3. HOVERABLE ROWS

Add `.table-hover` to enable a hover state on table rows within a `<tbody>`.

```
<table class="table table-hover">
  ...
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.4. TABLE BORDERS

4.4.1. Bordered tables

4.4.2. Tables without borders

4.4.1. BORDERED TABLES

Add `.table-bordered` for borders on all sides of the table and cells.

```
<table class="table table-bordered">  
  ...  
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

- **Border color utilities** can be added to change colors:

```
<table class="table table-bordered border-primary">  
  ...  
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.4.2. TABLES WITHOUT BORDERS

Add `.table-borderless` for a table without borders.

```
<table class="table table-borderless">
  ...
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.5. SMALL TABLES

Add `.table-sm` to make any `.table` more compact by cutting all cell `padding` in half.

```
<table class="table table-sm">
  ...
</table>
```

#	First	Last	Handle
1	Mark	Otto	@mdo
2	Jacob	Thornton	@fat
3	Larry the Bird		@twitter

4.6. VERTICAL ALIGNMENT

Table cells of `<thead>` are always vertical aligned to the bottom. Table cells in `<tbody>` inherit their alignment from `<table>` and are aligned to the top by default. Use the `vertical align` classes to re-align where needed.

```
<div class="table-responsive">
  <table class="table align-middle">
    <thead>
      <tr>
        ...
      </tr>
    </thead>
    <tbody>
      <tr>
        ...
      </tr>
      <tr class="align-bottom">
        ...
      </tr>
      <tr>
        <td>...</td>
        <td>...</td>
        <td class="align-top">This cell is aligned to the top.</td>
        <td>...</td>
      </tr>
    </tbody>
  </table>
</div>
```

Heading 1	Heading 2	Heading 3	Heading 4
This cell inherits <code>vertical-align: middle;</code> from the table	This cell inherits <code>vertical-align: middle;</code> from the table	This cell inherits <code>vertical-align: middle;</code> from the table	This here is some placeholder text, intended to take up quite a bit of vertical space, to demonstrate how the vertical alignment works in the preceding cells.
This cell inherits <code>vertical-align: bottom;</code> from the table row	This cell inherits <code>vertical-align: bottom;</code> from the table row	This cell inherits <code>vertical-align: bottom;</code> from the table row	This here is some placeholder text, intended to take up quite a bit of vertical space, to demonstrate how the vertical alignment works in the preceding cells.
This cell inherits <code>vertical-align: middle;</code> from the table	This cell inherits <code>vertical-align: middle;</code> from the table	This cell is aligned to the top.	This here is some placeholder text, intended to take up quite a bit of vertical space, to demonstrate how the vertical alignment works in the preceding cells.

5. FIGURES

- Anytime you need to display a piece of content—like an image with an optional caption, consider using a `<figure>`.
- Use the included `.figure` , `.figure-img` and `.figure-caption` classes to provide some baseline styles for the HTML5 `<figure>` and `<figcaption>` elements. Images in figures have no explicit size, so be sure to add the `.img-fluid` class to your `` to make it responsive.

```
<figure class="figure">  
    
  <figcaption class="figure-caption">A caption for the above image.</figcaption>  
</figure>
```

A caption for the above image.

```
<figure class="figure">  
    
  <figcaption class="figure-caption text-end">A caption for the above image.</figcaption>  
</figure>
```

400x300

A caption for the above image.

THE END
